

August 21, 2011

Dear C&D Auto Center

My name is Ed Greene and I just want to thank you for fixing my 1996 Ford pickup truck on August 17th of this year. I had been having trouble with it for over 2 weeks and it seems that whoever looked at it could not find or fix the problem. I was getting discouraged and did not know what to do. Finally on Wednesday the 17th it started for me and I thought all was OK. But that was not to be. I got stuck, had to be towed to your shop (Thank goodness) Your mechanics did an outstanding job on the spot to see if they could identify the problem and although you were busy you brought the truck right in to see what the problem was and within an hour the problem it seemed was found and corrected. It seems the wire connections at the fuse box was loose, it got fixed and is running fine now and I just wanted to write and thank you and your mechanics for an exception job well done! My truck is running fine and starts every morning!

Sincerely,

Ed Greene
